

Migration

Migration, an increasingly common phenomenon in our interconnected world, brings not only challenges to the destination territories, but also a variety of opportunities:

- Population growth and a reduction in the average age;
- Interculturalism;
- Social and economic enhancement of the territory;
- Construction of a community that is more open to integration, better prepared and more resilient.

Odemira Integra 3G Municipal Plan for the Integration of Migrants

- PMIM 2020-2022 -

Odemira Integra 3_G is a project that fosters the continuing collaboration between various bodies whose goal is the well-being, safety and identity of all those who call the municipality of Odemira home.

Our general goal

To work alongside local players in welcoming and integrating third-country nationals, implementing strategies that will increasingly ensure autonomy and equal opportunities for these citizens, through a socialisation process that will ensure harmony and social peace among all of Odemira's residents.

The PMIM operates in the following areas:

- Welcome and integration
- Urbanism and living accommodation
- The employment market and entrepreneurship
- Education and language
- Training and instruction
- Culture
- Health
- Citizenship and participation in civic life
- Solidarity and social response
- Media and raising public awareness
- Racism and discrimination
- International relations
- Religion
- Gender equality

To help us in the pursuit of these goals, we have support from the Local Commission for Interculturalism (CLI). This forum brings together public and private bodies and individuals with responsibility in terms of migration in the municipality of Odemira.

The Local Commission for Interculturalism:

Participates in the design, approval, monitoring and assessment of the PMIM;
Discusses the subject and contributes to a better understanding of the phenomenon of migration at local level;
Ensures the migrants' participation in local policy-making on various aspects of migration;
Promotes liaison between local partners in order to boost initiatives with the potential to ensure the successful performance of the plan;
Promotes better correspondence between the migrants' needs and what is available to them;
Contributes to the dissemination and performance of the plan.

The Commission comprises a very broad and pertinent set of partners whose activities in our territory are very diverse:

- São Teotónio School Cluster
- Vila Nova de Milfontes School Cluster
